Zero Manual Work

## Invoice Received by Email

Supplier sends a PDF, image, or XML file

A1

### Who Sent This Invoice?

#### WHAT IT DOES

Reads the invoice and automatically identifies which supplier sent it — no manual lookup needed.

A2

### What Type of Invoice Is This?

#### WHAT IT DOES

Analyses every detail — amounts, dates, line items — and classifies it as a purchase or cost invoice.

A3

### Does This Match an Order We Placed?

#### WHAT IT DOES

Checks if this invoice corresponds to a purchase order your company already sent to this supplier.

A4

### Which Account Does This Belong To?

#### WHAT IT DOES

Assigns the correct bookkeeping account code automatically — no accountant input required.

#### FINAL OUTCOME

#### Approved

Invoice matched and booked automatically.

#### Needs Review

No matching order found.  
Team will be notified.

#### Rejected

Not a valid invoice.  
Flagged and excluded.
